SUPPLEMENTARY REGIONAL GRAVITY DATA
FOR SOUTHWEST IOWA

In the summer of 1979 a regional grid of gravity stations at 6 mile spacings, located at approximate township centers, was established by Steven Daut (I.G.S. Open File Report, Jan., 1980). With these township center stations serving as base stations, 1341 new gravity stations were established by a series of third level loops using the Worden Prospector Model gravimeter owned by the Iowa Geological Survey. The field work for this report was conducted in the summer of 1980 in Adair, Audubon, Cass, Fremont, Guthrie, Harrison, Mills, Shelby and Pottawattamie counties, with the idea of completing a 1 mile grid over the northern portion of the Midcontinent Geophysical Anomaly in Southwest Iowa.

The stations are located as closely as possible to the centers of road intersections at the southwest corner of each section in the survey area. Where T-intersections were encountered, the stations were established on the North side of the East-West road or on the East side of the North-South road centered on the intersecting road. Stations are therefore numbered according to township, range and section numbers.

Road intersection elevations were taken from I.G.S. 7.5 minute topographic maps assumed accurate to ± 1 foot, and elevations were hand leveled in the field from the center of each intersection. The data was reduced using the program GRAVSUR (Kwon et al., 1977) modified for use on the Perkin-Elmer 3220 mini-computer owned by the Iowa Geological Survey. All gravity values, corrected to sea level using a Bouguer density of 2.67 gm/cm^3 , should be considered accurate to ± 1.5 milligals.

STATION LOCATIONS

ADAIR COUNTY

IOWA

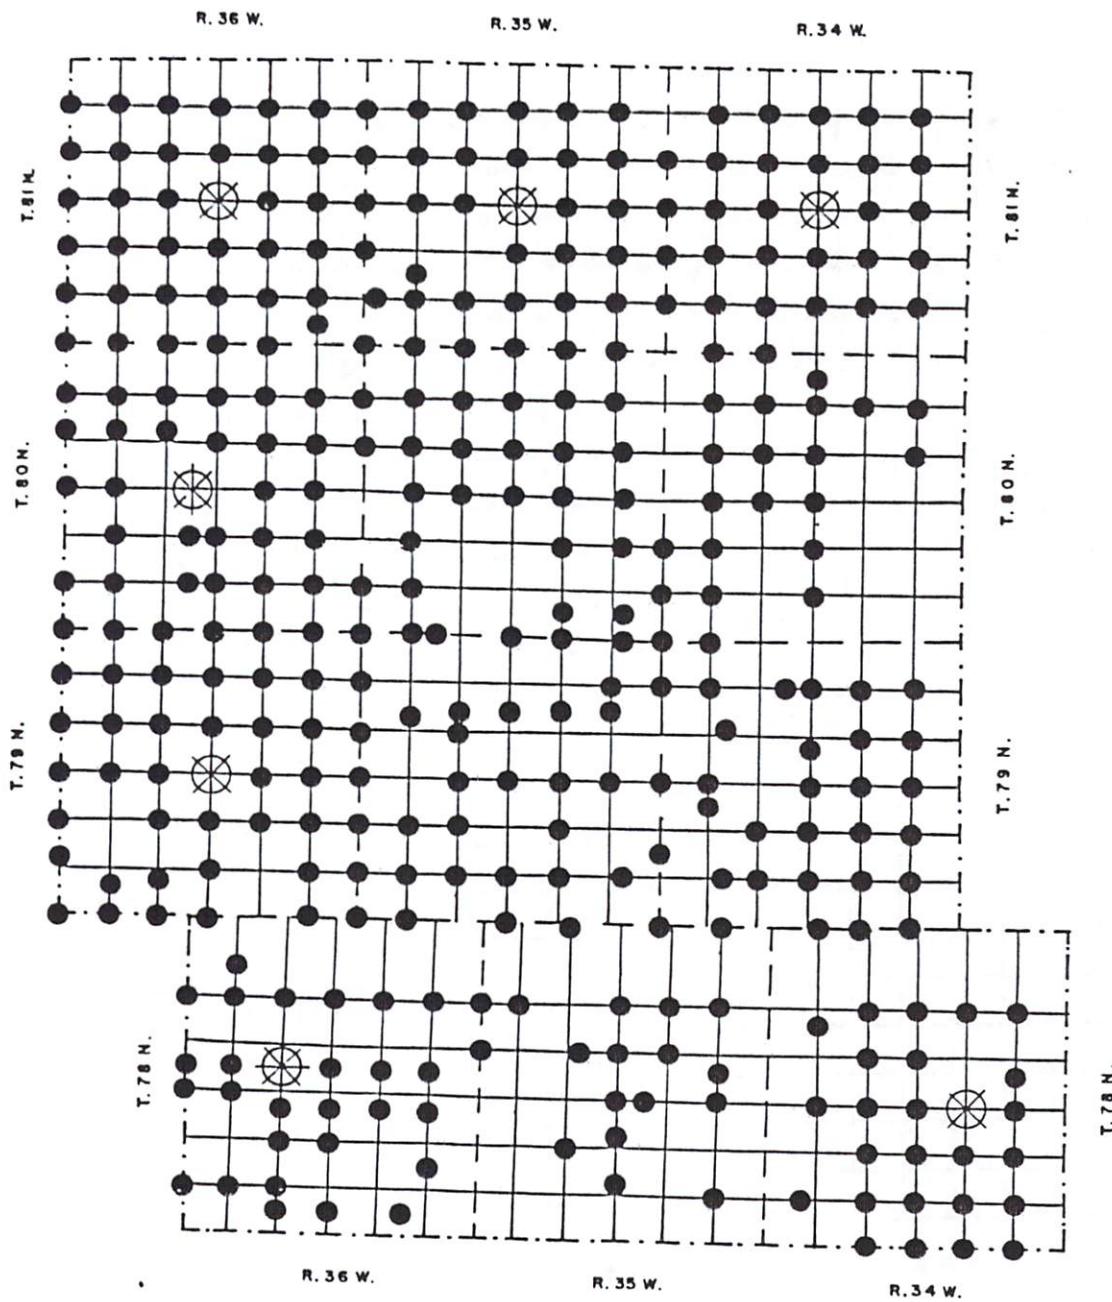

Scale: 1["] = 4 miles

Township center gravity stations established by Daut(1979), used as base stations for this survey.

- New gravity stations established by this survey.

AUDUBON COUNTY
IOWA

Scale: 1" = 4 miles

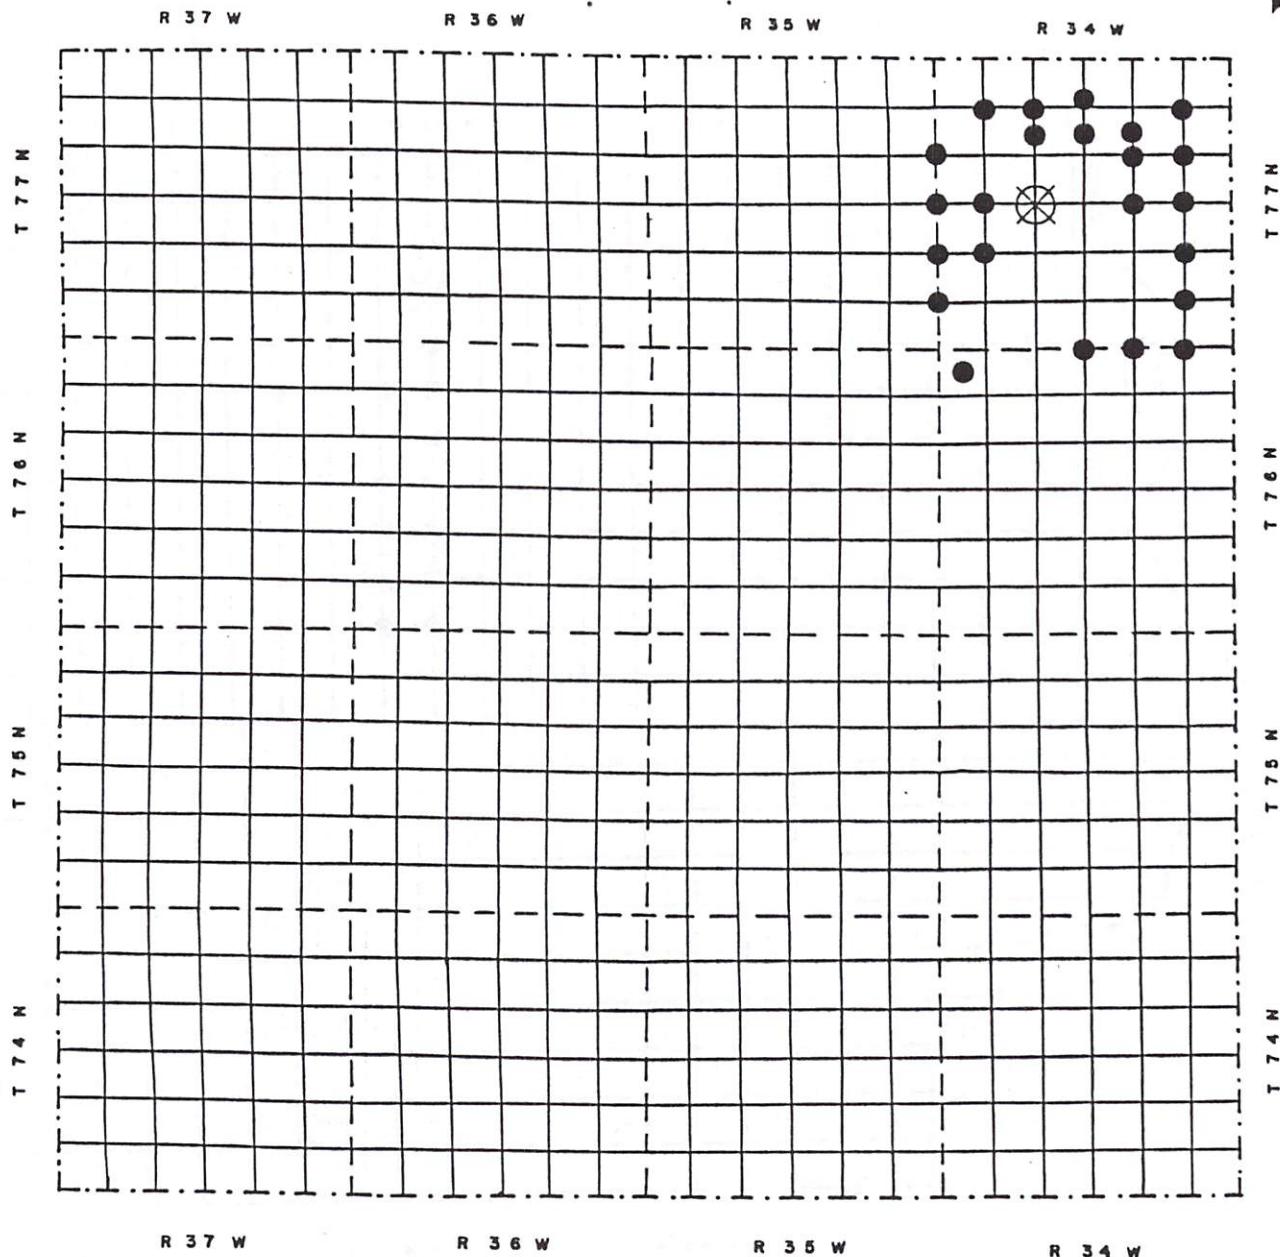

○ Township center gravity stations established by Daut(1979), used as base stations for this survey.

- New gravity stations established by this survey.

CASS COUNTY

IOWA

Scale: 1" = 4 miles

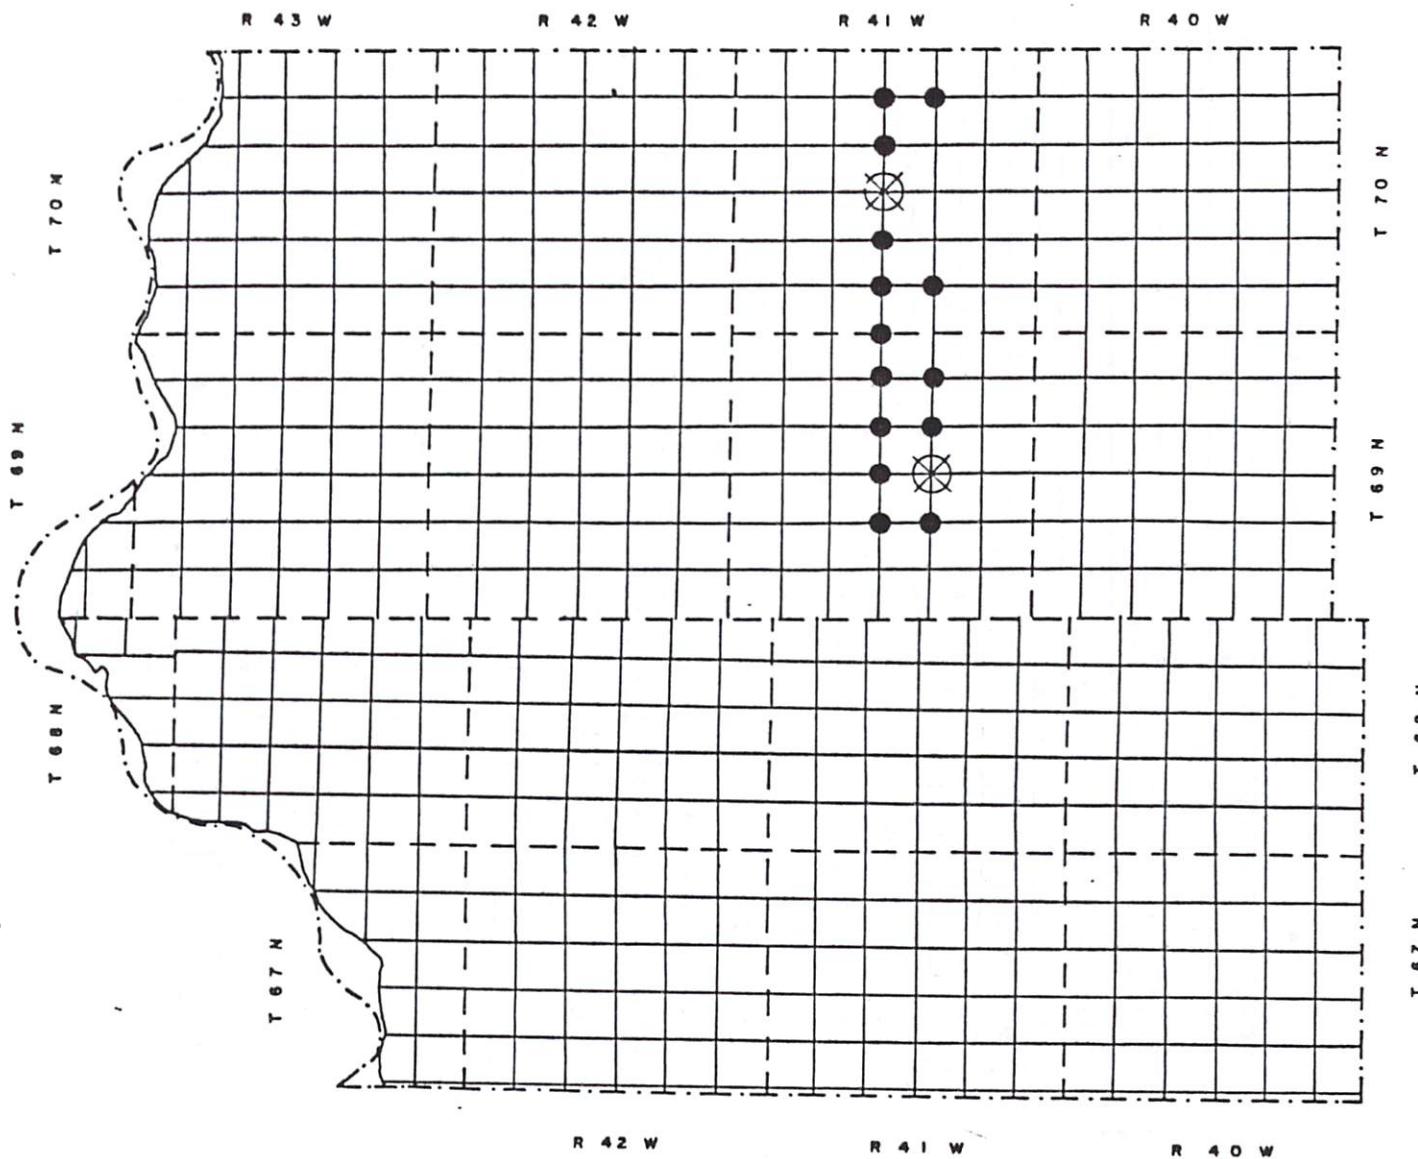

○ Township center gravity stations established by Daut(1979), used as base stations for this survey.

● New gravity stations established by this survey.

FREMONT COUNTY
IOWA

Scale: 1" = 4 miles

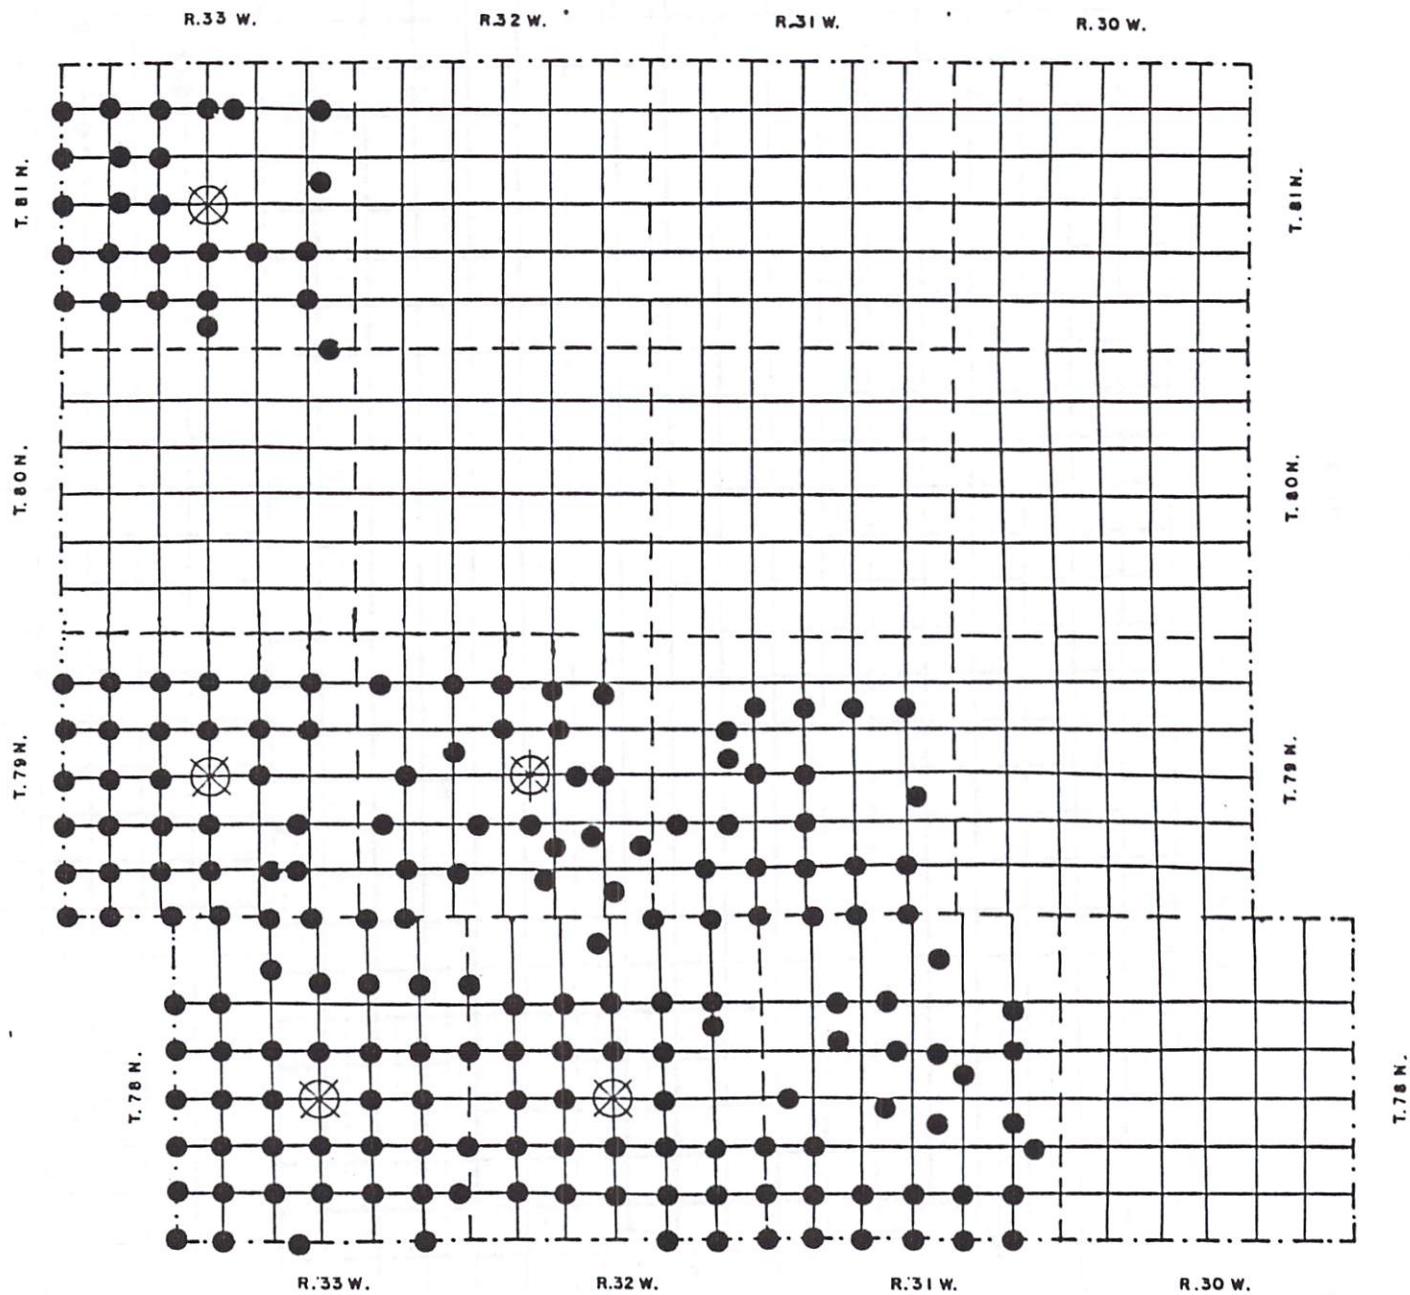

● Township center gravity stations established by Daut(1979), used as base stations for this survey.

● New gravity stations established by this survey.

GUTHRIE COUNTY
IOWA

Scale: 1" = 4 miles

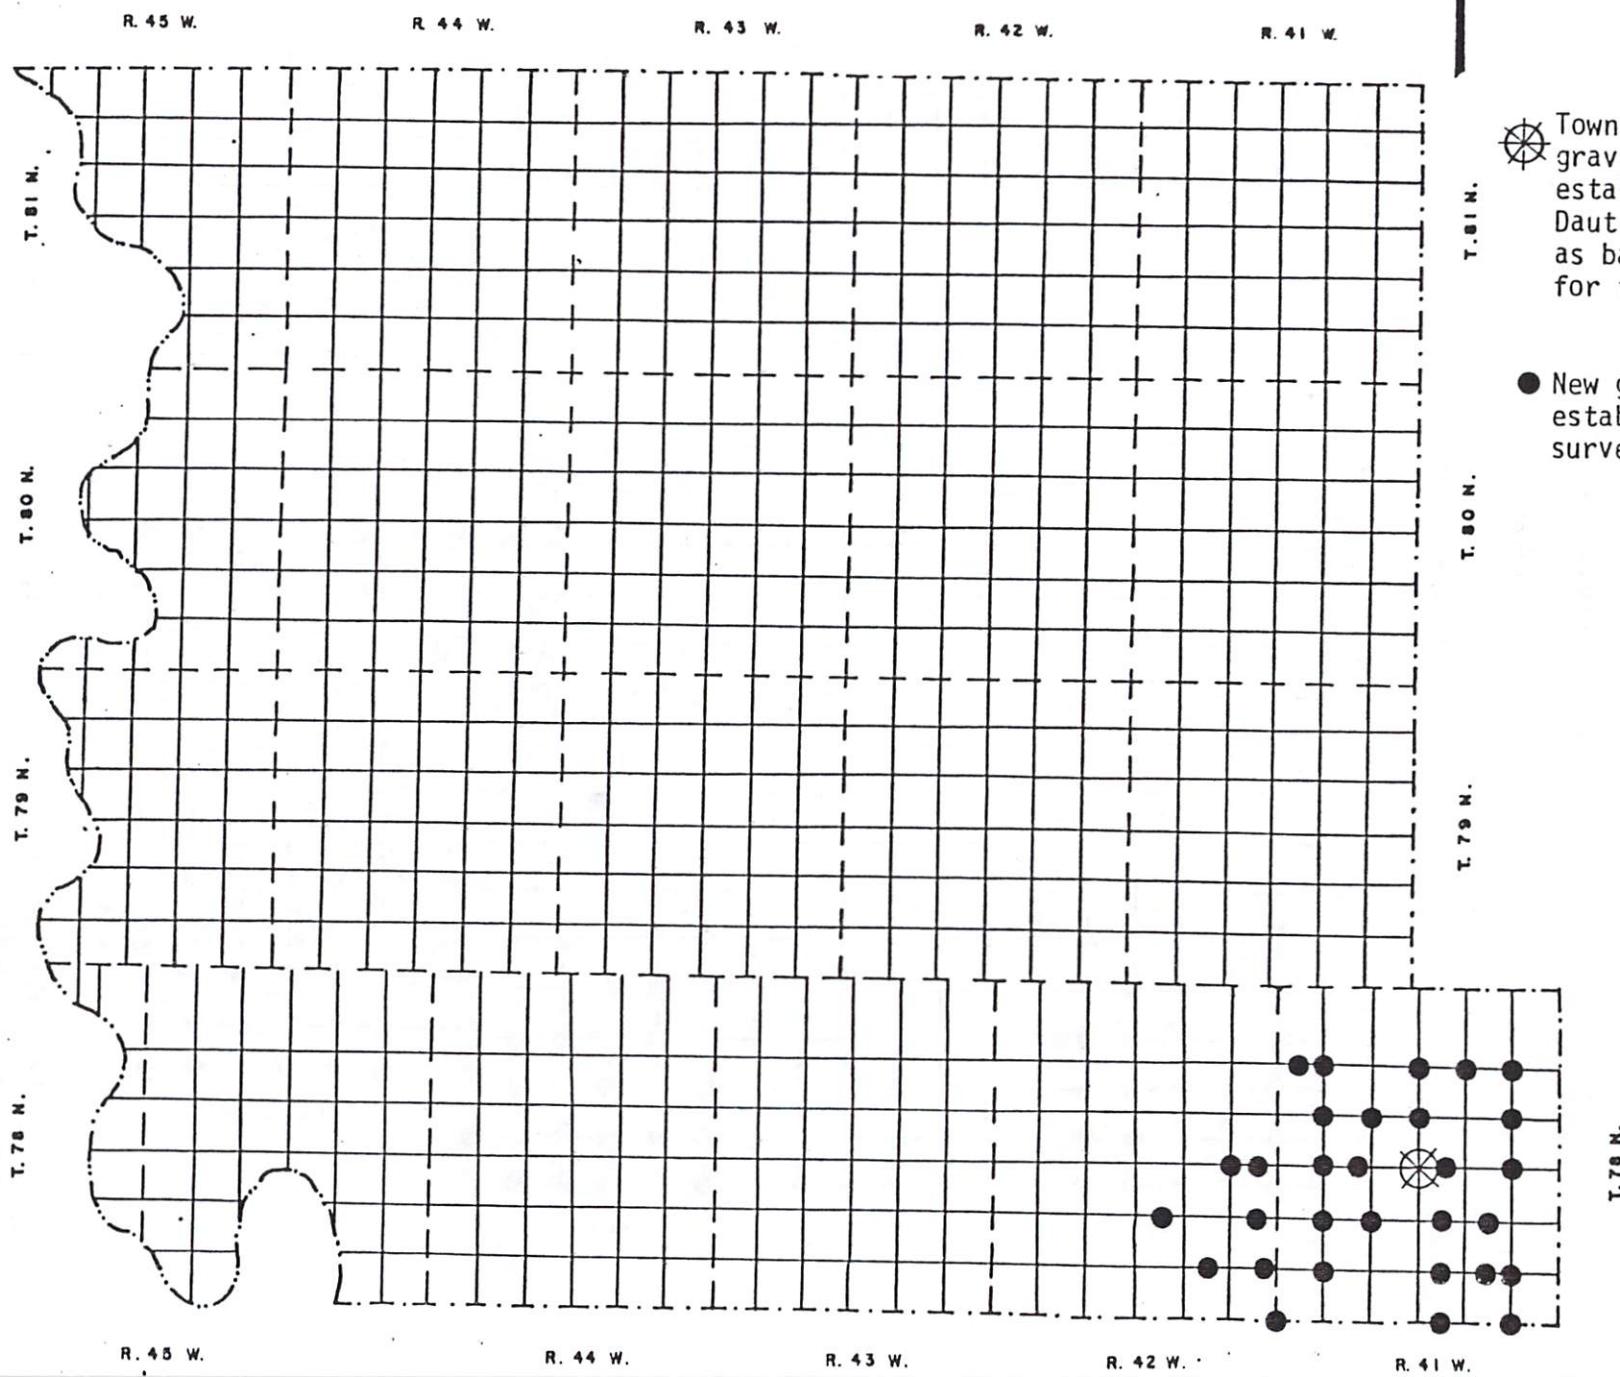

● Township center gravity stations established by Daut(1979), used as base stations for this survey.

- New gravity stations established by this survey.

HARRISON COUNTY

IOWA

Scale: 1" = 4 miles

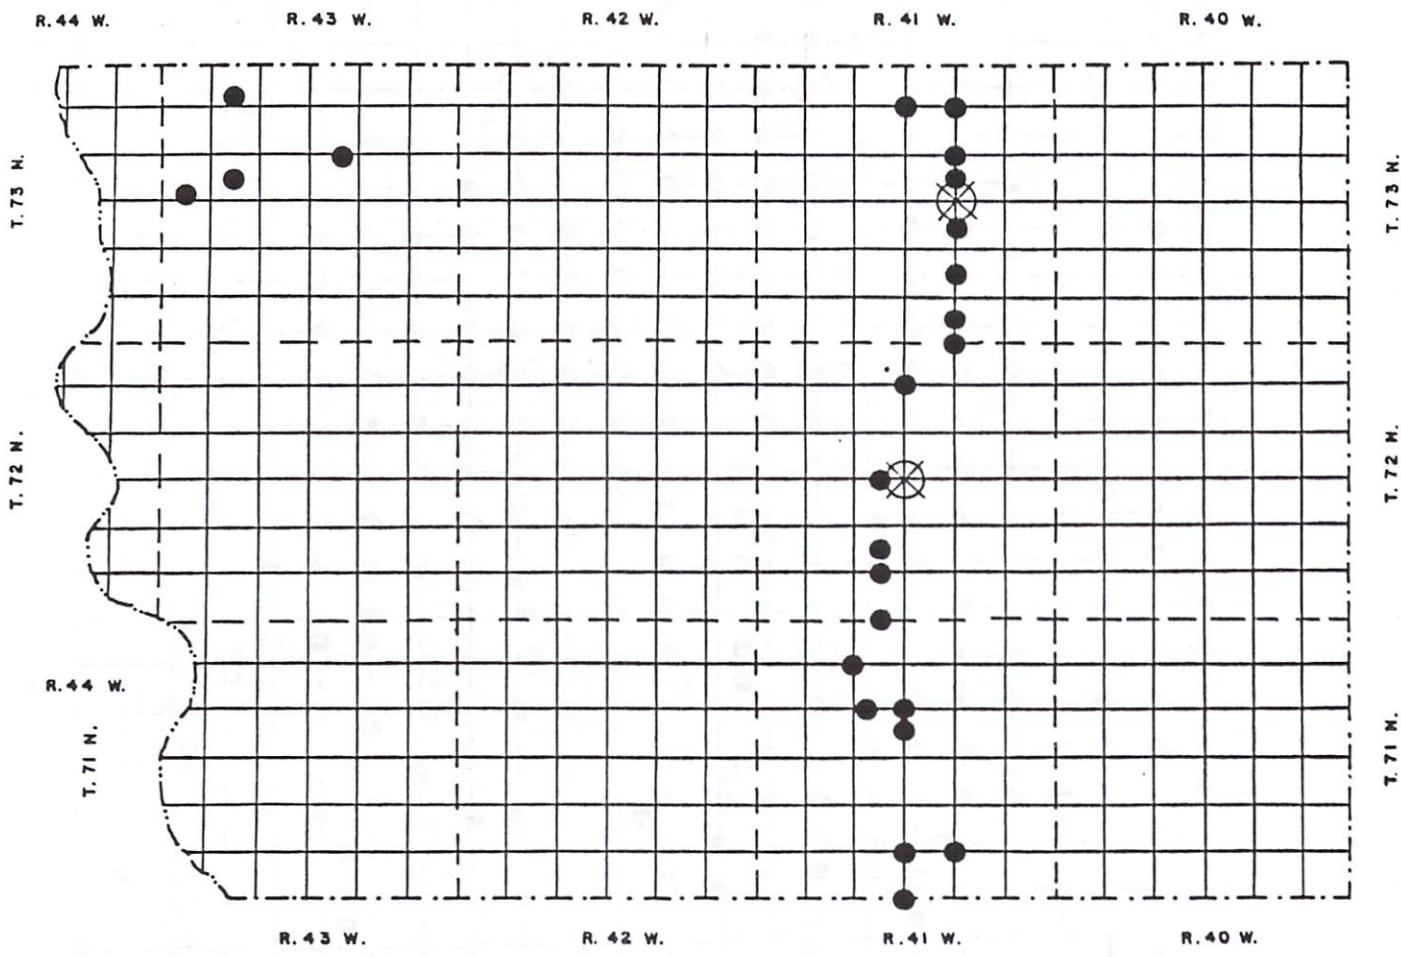

● Township center
gravity stations
established by
Daut(1979), used
as base stations
for this survey.

● New gravity stations
established by this
survey.

MILLS COUNTY

IOWA

Scale: 1" = 4 miles

● Township center gravity stations established by Daut(1979), used as base stations for this survey.

● New gravity stations established by this survey.

POTTAWATTAMIE COUNTY

IOWA

Scale: 1^{inch}=4 miles

 Township center gravity stations established by Daut(1979), used as base stations for this survey.

 New gravity stations established by this survey.
