Scour predictions made for land cover conditions as shown in the 2009 High Resolution Land Cover database and soil conditions as shown in the 2013 USDA NRCS gSSURGO database. Levees shown may or may not be accredited by FEMA. Levees and similar structures not FEMA-accredited are not shown to provide flood protection on the maps. For more information on levee accreditation, please visit www.fema.gov. Some sections of stream are missing depth and/or inundation maps; this had to be done in areas that incorporated detailed studies or digital conversions as part of the Iowa Floodplain Mapping project.
