Iowa Floodplain Mapping project

For more information on levee accreditation, please visit www.fema.gov.

Scour predictions were not made behind levees that appear to protect against the 1% annual flood.

Levees shown may or may not be accredited by FEMA. Levees and similar structures not FEMA-accredited are not shown to provide flood protection on the maps.

Some sections of stream are missing depth and/or inundation maps; this had to be done in areas that incorporated detailed studies or digital conversions as part of the Iowa Floodplain Mapping project.
